

Code-Layout, Readability and Reusability

Date	29 September 2026
Team ID	SWTID-2026-4095
Project Name	Student Enrollment & Course Management System (SECMS)
Maximum Marks	5 Marks

Code-Layout, Readability and Reusability

SECMS is a low-code Salesforce solution. The checklist below assesses the structure, readability and reusability of the configuration (objects, flows, rules, reports) in the same way a codebase would be assessed.

Code Layout Checklist

S.No	Quality Parameter	Description	Followed (Yes / No / Partial)	Remarks
1	Consistent formatting	Uniform layout of records, pages and flows	Yes	Standard Lightning layouts and consistent tab styles
2	Proper structure	Components are logically organized	Yes	Objects, tabs, layouts, automation, reports and security configured as separate parts
3	Meaningful names	Names reflect purpose	Yes	e.g. Enrollment_Status__c, Enrollment_Date__c, Fees Paid, AutoAssign_Instructor
4	Descriptive labels for automation	Flows and rules are clearly named	Yes	SetEnrollmentDate, Create_Followup_Task, Approval_Enrollment_Request
5	Comments / descriptions	Explanations for logic	Partial	Provided in project documentation; declarative tools have limited inline comments
6	Modular design	Reusable, separate components	Yes	Separate flows per task; four objects linked by lookups
7	Redundant configuration removed	No duplicate logic	Yes	One flow per purpose
8	Error handling	Invalid data is handled	Yes	Validation rules show error messages for invalid input

Reusable Components / Modules

S.No	Component / Module Name	Language / Technology	Where Reused	Reusability Level (High / Medium / Low)
1	Student object	Salesforce custom object	Enrollment lookup, reports, dashboard	High
2	Course object	Salesforce custom object	Enrollment lookup, instructor assignment flow, reports	High
3	Instructor object	Salesforce custom object	Enrollment lookup, assignment flow	High
4	Enrollment object	Salesforce custom object	Record types, approval, flows, reports	High
5	Automation flows	Salesforce Flow	Enrollment workflow	High

S.No	Component / Module Name	Language / Technology	Where Reused	Reusability Level (High / Medium / Low)
6	Reports and dashboard	Salesforce Reports / Dashboards	Operational monitoring	Medium

Overall Code Quality Assessment

Aspect	Rating (1-5)	Comments
Layout & Structure	4	Objects, flows and rules are logically grouped.
Readability	4	Descriptive labels and consistent naming.
Reusability	4	Standard object relationships and separate flows.
Documentation	4	Configuration steps documented with screenshots.
Overall Score	4	Strong maintainability for the current declarative scope.
