

No. of Functional Features Included in the Solution

Date	29 September 2026
Team ID	SWTID-2026-4095
Project Name	Student Enrollment & Course Management System (SECMS)
Maximum Marks	5 Marks

Functional Features Overview

This document lists the functional features included in the SECMS solution with the purpose, module and implementation status of each.

S.No	Feature Name	Feature Description	Module / Component	Status (Done / In Progress / Pending)
1	Student Management	Store student name, email, phone, date of birth, status and address.	Student object	Done
2	Course Management	Store course name, category, duration, fee and description.	Course object	Done
3	Instructor Management	Store instructor name, code, expertise, phone and email.	Instructor object	Done
4	Enrollment & Re-Enrollment	Record enrollments with New Enrollment and Re-Enrollment record types, lookups, fees and status.	Enrollment object, record types, layouts	Done
5	Validation Rules	Student email condition; approval blocked when fees are not paid.	Validation Rules	Done
6	Approval Process	Route Requested enrollments for approval or rejection and update the status.	Approval Process	Done
7	Automation Flows	Set enrollment date, approval notification, automatic instructor assignment and follow-up tasks.	Flows	Done
8	Reports	Students by Status, Enrollments by Course, Pending Enrollment Approvals, Revenue Report.	Reports	Done
9	Dashboard	Student Management Dashboard with donut chart, bar chart, gauge and table.	Dashboards	Done
10	Role-Based Security	Profiles, permission sets and sharing settings / OWD.	Security	Done

Feature Summary

Metric	Count / Value
Total Features Planned	10
Total Features Implemented	10
Core / Must-Have Features	10 (objects, validation, approval, automation, reporting, security)
Additional / Nice-to-Have Features	None in the current scope; payment gateway, self-service portal, analytics and mobile access are future scope

Metric	Count / Value
Features Tested & Verified	Validation and automation tests TC-11 to TC-16 recorded as PASS; remaining test cases to be confirmed by the group after execution

Feature Category Breakdown

S.No	Category	Features in Category	Example Features
1	User Interface (UI)	3	Tabs, Lightning App, page layouts, record types
2	Backend / Logic	3	Validation rules, approval process, flows
3	Database / Storage	4	Student, Course, Instructor, Enrollment objects with lookups
4	API / Integration	0	Not in current scope (payment gateway is future scope)
5	Security / Authentication	3	Profiles, permission sets, sharing settings / OWD
